Joystick Control

DESCRIZIONI FORNITE DAL CANTIERE

Built for speed and efficiency, the Monte Carlo 47's hull design has been especially developed to optimise the performance of the Volvo Penta IPS system. The choice of this technology gives the boat some unique advantages, such as the power of the pods, optimised fuel consumption, comfort, increase in space, flexibility and ease of handling. The innovative conception of the Monte Carlo 47 draws together the concept of an Open and a design which protects the wheelhouse, as well as benefiting from an enormous cockpit with electric opening roof and sun canopy extension, etc. Everything is designed to simplify your life on board. Two layout versions are available, with either 3 cabins, providing a generously proportioned V.I.P. cabin forward with comfortable headroom.
